

Another 100 DAFs for Jan de Rijk Logistics

Jan de Logistics strengthens its 700 vehicles large fleet with another 100 DAFs. The key of the first vehicle of this series, a DAF XF 440, was handed over to Sebastiaan Scholte, CEO of Jan de Rijk Logistics, by DAF Trucks President Preston Feight.

The handover reflects the long and intensive cooperation between the two proud Dutch companies. Already more than 95% of the fleet of Jan de Rijk Logistics are DAF trucks. Jan de Rijk Logistics is closely involved in the logistics processes of the successful truck manufacturer, which has only expanded since the acquisition of De Rooy Logistics in 2015.

DAF and Jan de Rijk Logistics: more than partners

An important part of the automotive related logistics activities are carried out for DAF. “Jan de Rijk Logistics is much more than a customer”. We work very closely and continue to grow closer together. We see this trend reflected more and more in the entire supply chain. I am glad that we can contribute to the success of Jan de Rijk Logistics with our very high-quality and highly efficient trucks,” said Preston Feight.

Low total cost of ownership

The 100 new DAF Euro 6 vehicles fit into the ambition of Jan de Rijk Logistics to provide reliable, efficient, innovative and sustainable logistics solutions for its customers. “The quality of the DAF vehicles, the excellent dealer network and the low cost of ownership are always decisive for us. That is why we have chosen for DAF again” said Sebastiaan Scholte.

New trucks for all European locations.

The 100 new vehicles – both tractors and rigids of the CF en XF series – will be used by the various European divisions of Jan de Rijk Logistics. The new trucks will replace a part of the current fleet. The purchase was made in close cooperation with DAF dealers Van Tilburg-Bastianen and De Burgh.
