Agility is Funding the Development of Domestic and Regional Trade in Africa

Many firms operating on the continent are regularly experiencing shortages of industrial space

ACCRA, Ghana, May 24, 2018/ -- Agility (www.Agility.com), a leading global logistics provider, has leased warehouse space in the Agility Warehouse Park in Ghana to Cummins (www.Cummins.com) for a new West African Distribution Center.

Many firms operating on the continent are experiencing shortages of professional industrial space. The provision of international standard warehouses in Africa for storage, distribution and light manufacturing is one of the fundamental building blocks necessary for economic growth in Africa.

Agility, a leading global logistics provider who owns and operates over 21 million m² of warehouse parks around the world, has leased warehouse space in the Agility Warehouse Park in Ghana to Cummins for a new West African Distribution Center. The Agility Warehouse Park in Ghana is part of a network of international standard warehouse parks that Agility is funding and developing across key markets in Africa to support the development of domestic and regional trade.

Cummins, one of the world's leading manufacturers of diesel engines, generators, filtration and associated engine components, will use the facility to stock and distribute a range of over 10,000 spare parts for Cummins' operations across West Africa.

Cummins joins other multinationals and small and medium-sized Ghanaian companies that have chosen the Agility Warehouse Park at Tema because its secure, convenient location provides international standard warehousing and services for their West African operations.

Location was a significant factor in Cummins' selection. The Agility park is eight kilometers from Ghana's main seaport and is adjacent to the Aflao highway connecting Ghana to Ivory Coast, Togo, Benin, and Nigeria.

Felix Bani, Cummins Operations Manager - Central Supply Chain Operations (CSCO), said:

“Product distribution can be fast-tracked, either by road, sea or air. By choosing the Agility Warehouse Park, Cummins has addressed one of the biggest constraints to companies doing business in West Africa – the lack of quality infrastructure.”

Bani said Cummins was also attracted to the facility because it meets international environmental standards and features eco-friendly construction materials. Agility used energy efficient roof and side insulated panels; wind-driven roof fans; skylights for natural lighting; LED and energy-saving bulbs; and solar-powered streetlights. The site will recycle paper, plastic, metal, and carton waste. It provides eco-friendly waste management services and carbon footprint reporting.

Geoffrey White, CEO Agility Africa, said, “The Agility Warehouse Parks enable companies, whether multinationals such as Cummins, or small and medium enterprises, to access quality infrastructure easily, quickly and cost effectively.”

PRESS RELEASE

24 May 2018

Groupe ADP wins a contract at the United Arab Emirates (UAE) to design and supervise the expansion of the Sharjah International Airport

Groupe ADP, through ADP Ingénierie, wins a €15 million contract to design and supervise the expansion of the Sharjah international Airport, at Sharjah, one of the seven emirates of the UAE.

At the end of a very competitive tender, ADP Ingénierie has been appointed by the airport authority who have decided, as part of an overall modernization project, a \$410 million expansion project for the Sharjah international Airport.

This project, one of the largest airport development currently ongoing in the region, consist in an increase of the capacity of the existing terminal - from the current 11 million passenger traffic to 17.5 million passenger per year over the long term -, while enhancing the passenger experience, including flows segregation (departures/arrivals) and additional aircraft parking stands.

Gratien Maire, CEO of ADP Ingénierie said "this new contract rewards our know-how in Airport design in a part of the world where we are very active. Our team of expert will be deployed in Sharjah. One of the challenge will be to maintain the airport capacity and operations at all time during the execution of the construction packages, which are expected to start on 2019."

Committed in the UAE for 40 years, Groupe ADP has a strong knowledge of the issues of the region. It is deeply aware of the issue of the international airport for the economic dynamism and touristic attractiveness of the country. So, ADP Ingénierie proposed several projects of design combining modernity and efficiency with the respect of the heritage and local traditions: the emirate of Sharjah is viewed as the "world book capital" and a cultural city of the country.

Sharjah international Airport is the home of Air Arabia airline and have to support the growth of traffic due to the development of low cost airlines in the Gulf region.

About ADP Ingénierie

100 % owned subsidiary of ADP International – which is in charge of the overall activities outside France of Groupe ADP –, ADP Ingénierie is a global leader in airport design. Its core activity is designing an undertaking international development and infrastructure airports projects. Developing a 360° airport expertise, it provides a range of consultancy, project contracting assistance and supervision studies (studies and supervision of works), as well as project management services related to the French delegated project contracting assignments.

The company has over 700 references in over 130 countries and it currently manages about 100 projects. At end of 2017 its backlog amounted to €61 million.
