

# Airline Services International selects e-CARGOWARE Cloud platform to manage its GSA Operations

---

London, United Kingdom., Sep 19, 2017 /Press Release/ -- e-CARGOWARE today announced that it has been selected by Airline Services International – Canada to digitize their expanding Cargo GSA Operations throughout Americas starting with its main sales station in Toronto – Canada.

e-CARGOWARE's cloud based Cargo Management Platform is flexible, robust, easy to use, eliminates paper and conforms to IATA e-AWB specification. The platform is used by several GSSAs and Cargo Handlers worldwide to actively market and service leading airlines including the likes of Delta, American Airlines, British Airways, Emirates, Lufthansa, Qatar, Etihad to name a few.

Airlines Services International - ASI operates in markets throughs the United States, Canada, Asia, and the Indian subcontinent, and has successful partnerships with more than 10 airlines. ASI strives to deliver an exceptional level of service to both the airlines they represent and their clients and customers.

“We are excited to announce our association with e-Cargoware Ltd” said Joe Lawrence, President of ASI “As a growing company we are on the lookout for a cloud platform that’s flexible and automates our operation thus improving operational efficiency and serve our customers better. e-CARGOWARE platform is, cost effective, easy to use and will help us provide a superior service to our customers. Its dashboards will help my management team monitor our entire network remotely.”

Arun Singh, Senior Director and Co-Founder said “We are pleased to welcome ASI, on board e-CARGOWARE cargo platform that’s already used by several forward-thinking Cargo GSSAs that are embracing digitization route to reduce inefficiencies, increase revenues and provide a superior customer experience”.
