

Press release

An Express service at almost half the price.

On 1st July, Espace launched its new Express PLUS 1 service.

Express PLUS 1 lets Espace offer a heavily discounted semi-express service by co-loading two express shipments on the same van. The PLUS 1 element refers to the extra day required to deliver the express shipment due to the discounted rate.

The Express PLUS 1 service compliments Espaces' dedicated van service which was rebranded in November 2012 as "The Freight Emergency Service". It still offers a Money Back Guarantee or as their service tagline states....." if we're late, you won't pay the rate."

Since 2012 their dedicated express service has gone from strength to strength, culminating in a record month for Espace's express freight in June 2017.

Geoff Yates, Express manager, commented, "It's a competitive market so I am always looking for ways to give Espace a competitive advantage. Some shipments won't stand a dedicated van rate to / from Europe but they still need to be delivered in 48 hours. Traditional groupage services cannot do this, that's why we developed our semi-express service. A dedicated non-tranship service at almost half the cost of a dedicated van."

"Customers who have an express shipment are now offered 2 prices; a dedicated and a co-load express price. It's all about giving our customers more choice" said Tony Shally, Espace's M.D.
