

Saudia Cargo Launches Fly Express Service

October 2018

Saudi Airlines Cargo Company launched its newest product “Fly Express”, offering high priority express delivery for urgent international shipments.

Fly Express service is an added value service that offers customers high priority status for shipments that can be accepted 3 hours prior to the Scheduled Time of Departure, alongside quick handling procedures at arrival.

The new service offers early booking via the below email for a fast, efficient, and reliable airport-to-airport delivery of up to 300 kilograms per shipment, as well as a Money-Back Guarantee for the added cost of the service if it does not deliver on time. For more information and booking inquiries please contact: flyexpress@saudiacargo.com

Saudia Cargo clients will be able to benefit from Fly Express services in the following European cities: Brussels, Amsterdam, Frankfurt, Milan, Paris, London inbound to Saudi Arabia, with Hong Kong to be added in December 2018 and additional cities to be announced in the future.

The Fly Express service was officially announced during the annual commercial meeting of Saudia Cargo with representatives of freight agencies. At the meeting, Saudia Cargo CEO Omar Hariri said: “The launch of this service will meet the needs of our clients who transport urgent cargo requiring rapid handling and short delivery period, with efficiency and reliability. This service came as part of our determination to ensure the satisfaction of our clients.”

Saudia Cargo, recently launched the development project for its cargo facilities in King Abdulaziz International Airport in Jeddah, and King Khalid International Airport in Riyadh, to enhance its operational capacity, as well as provide special warehousing for pharmaceutical goods, dangerous goods, and the various specialty shipments.

Saudia Cargo has a wide global network, supported by a dedicated freighter fleet. It also offers ample capacity on passenger flights and delivers efficient and cost-effective solutions for charter aircraft on international destinations.
